

Prince of Persia Game Evaluation:

1. The Platform: website, easily accessible for people on computers. Harder for people on phones. May not be accessible for people on playing stations
2. Game Mechanics: not many rules or guidance on what should be done. Unclear.
3. Storytelling: Interesting enough to understand.
4. Visual Design: I enjoy it. Pixelated but still gives detailed movements
5. Game pacing: I like how it only gives you an hour to complete, builds pressure
6. Player engagement: Some players may lose some engagement if they're not able to figure out how to complete levels.
7. Graphics and audio: Low graphics(pixelated) due to being older. I enjoy the background music and the sound effects.
